

Cavafix[®]

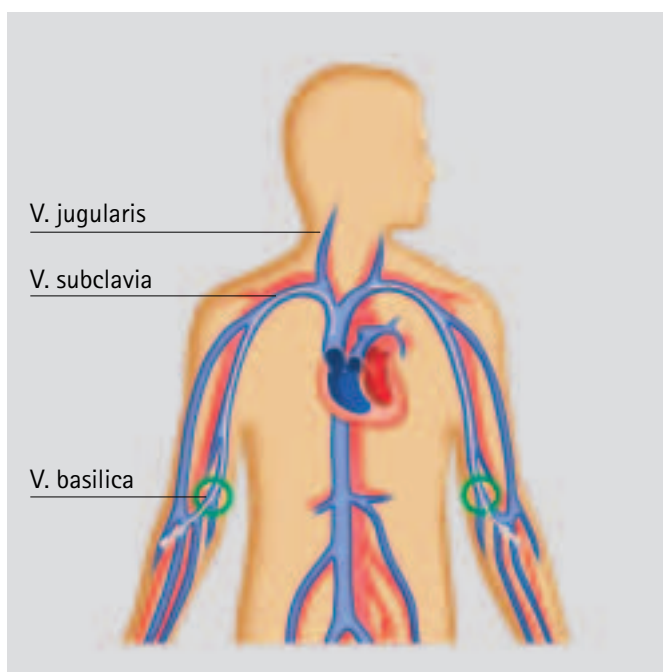

Fast and safe catheterisation
of the vena cava

B | BRAUN

Cavafix®

The peripheral venous access ...

- ... for central venous catheter placement in the vena cava
- ... for venous catheter placement in the vena subclavia (Midline)

The vena basilica as peripheral venous access enables

- easy puncture
- few complications caused by puncture
- less painful puncture for the patient

Shorter catheter lengths for higher flow rates are available for the vena subclavia and the vena jugularis.

Safe access for the planned infusion therapy

- long-term administration of highly efficacious medicaments and parenteral nutrition
- measuring of the central venous pressure

Fast and precise placement in case of emergency

- sterile catheterisation in most difficult conditions and thus prompt availability of highly efficacious solutions.

Cavafix®
Proven and established
in general and clinical
practice
