

New, colour-coded packaging for infusion and transfusion sets

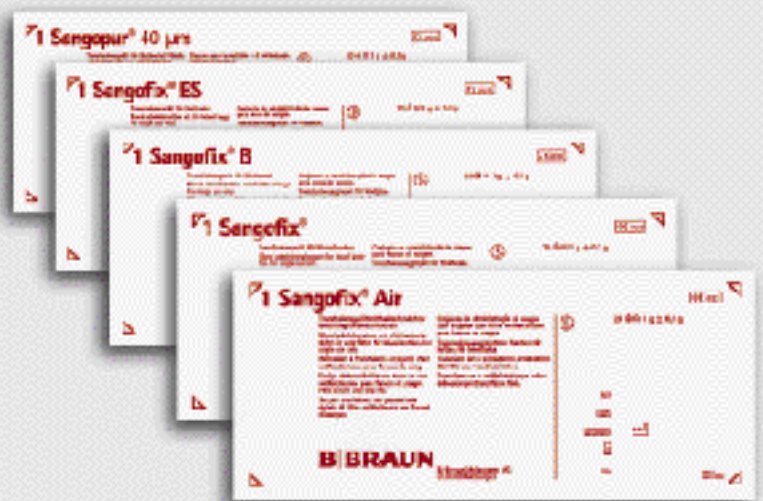

Easy and immediate identification of different set types and their features... at a glance

At a glance: The right set for infusion or transfusion

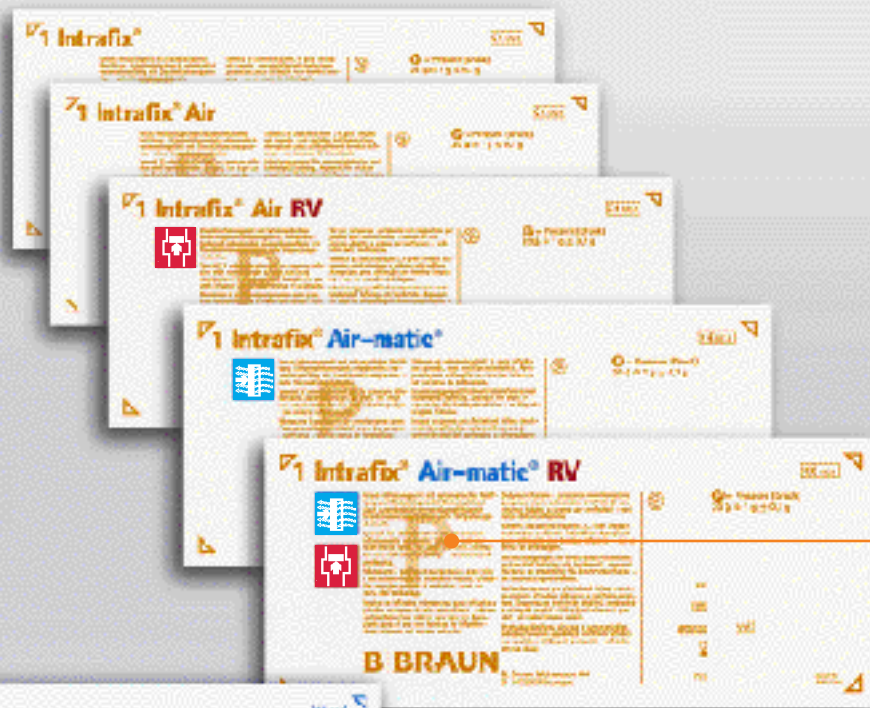

New, colour-coded packaging design facilitates quick identification of different set types and features

Infusion sets for special applications

Transfusion sets

Automatic venting
Air-matic®
RV
Back-check valve

Infusion sets for pressure infusions

P = Pressure

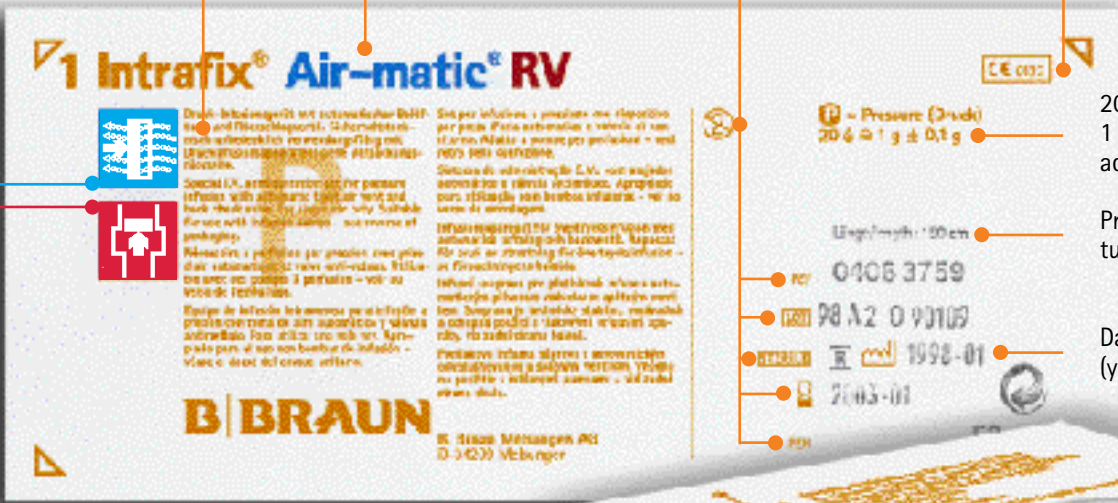

Infusion sets for gravity infusions

G = Gravity

The labelling of product packaging in accordance with the MDD (Medical Device Directive) provides all the necessary information about the product and its use:

Product name, special features

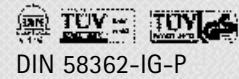

Product description with designated purpose; in various languages

CE 0123 = CE certification and number of the notified body

The CE certification stands for comprehensive proof of the proper functioning and safety of medical products.

This certification takes the place of all other testing, safety and other quality certifications as:

2 = For single use only

REF = Code number

LOT = Charge number

STERILE R = Radiation sterilisation or

STERILE EO = Ethylene oxide sterilisation

⌚ = Expiry date (year/month)

PZN = Pharma Central Number

20 drops yield:
1 g (1 ml) ± 0.1 g (0.1 ml)
aqua dist.

Product features, e.g.
tubing length

Date of manufacture
(year/month)

On the back side:
Instructions for use

⚠ = Attention! See further instructions for use, e.g. for infusion pumps

Infusion and transfusion sets from B. Braun
